

2018 Call for Presentations

Resiliency in the Face of Change

The Project WET Foundation invites you to share your water education expertise by presenting at the 2018 Project WET Annual Coordinator's Conference and Training in Mystic, CT. Presentations will take place on September 12th and 13th. Presenters are encouraged to engage in interactive presentations to address the conference topic, Resiliency in the Face of Change. We ask that you please focus your presentations on how your program activities bring a fresh approach to Project WET and ensure the success in the future. Presentations will be limited to 30 minutes unless approved in advance for additional time. We look forward to learning about your best practices, successes and proven techniques.

Suggested topics for presentations include but are not limited to:

- Ocean Literacy and Resilience
- Water and Food
- Sustainability Topics
- Extreme Weather
- Green Design and Planning
- Drought and Floods
- Water Access and Human Needs

Deadline for submission is April 15, 2018. Selections will be made by May 1, 2018.

Presentation Options

All forms of presentation are important to Project WET. Please consider which type of presentation best suits your topic and expertise.

Oral Presentations

Presenters have the opportunity to speak to an audience of peers. In the spirit of Project WET, we encourage interactive presentations.

Table Discussion

Round tables designated with specific topics of discussion for the group(s). Topic tables allow participants to debate, share ideas and brainstorm solutions with fellow water education experts.

Activity Presentation

Conduct a hands-on activity to share information about environmental resiliency. Project WET activities are encouraged!

Conference Audience

During presentation sessions the conference will be open to both Project WET Coordinators and partners such as facilitators, educators and sponsors. Project WET Coordinators are the leaders who manage Project WET programs in a designated area and state. Coordinators work for and with a wide variety of institutions including non-profit organizations, governments, universities and private nature reserves.

Project WET facilitators and educators bring the Project WET program and educational materials into classrooms. Most are environmentally focused but some educators are math, all-encompassing "science" or physical education teachers. Project WET educators are pre-K through high school. This diverse group of people may reach different target audiences and work in different agencies or subjects; however, all share one common interest: empowering youth to become water stewards through effective, hands-on water education.

Water Education for Teachers

This is a PDF form. It is meant to be saved to your computer, filled out and sent electronically via the SUBMIT button at the top of the form or by saving the filled form to your computer and sending it to wetusa@projectwet.org Please contact Project WET at wetusa@projectwet.org if you have any problems with the electronic submission.
